

**In the Claims**

The following Listing of Claims replaces all prior versions in the application:

LISTING OF CLAIMS

1. (Canceled)
2. (Currently amended) An apparatus comprising:  
a wedge-shaped shell adapted to physically connect under a telephone, the shell having a  
port to connect to a telephone wire;  
the shell containing interconnection logic operably connected to the ports and a wire to  
connect to the telephone; and  
a networking card in the shell for connecting to a personal computer, the networking card  
being operably connected to the interconnection logic, wherein digital data from the network card  
and voice data from the telephone can be alternately sent across the telephone wire~~The apparatus~~  
of claim 1, wherein the shell is wedge shaped.
3. (Currently amended) The apparatus of claim ~~1~~2, wherein the shell has a port to connect to the personal computer.
4. (Currently amended) An apparatus comprising:  
a shell adapted to physically connect under a telephone, the shell having a port to connect

to a telephone wire;

the shell containing interconnection logic operably connected to the ports and a wire to  
connect to the telephone; and

a networking card in the shell for connecting to a personal computer, the networking card  
being operably connected to the interconnection logic, wherein digital data from the network card  
and voice data from the telephone can be alternately sent across the telephone wire ~~The apparatus~~  
~~of claim 1,~~

wherein electronics in the shell allow for a wireless connection to the personal computer.

5. (Currently amended) An apparatus comprising:

a shell adapted to physically connect under a telephone, the shell having a port to connect  
to a telephone wire;

the shell containing interconnection logic operably connected to the ports and a wire to  
connect to the telephone; and

a networking card in the shell for connecting to a personal computer, the networking card  
being operably connected to the interconnection logic, wherein digital data from the network card  
and voice data from the telephone can be alternately sent across the telephone wire ~~The apparatus~~  
~~of claim 1,~~

wherein the shell has extensions for physically connecting to the bottom of the telephone.

6. (Currently amended) An apparatus comprising:

a shell adapted to physically connect under a telephone, the shell having a port to connect  
to a telephone wire;

the shell containing interconnection logic operably connected to the ports and a wire to connect to the telephone; and

a networking card in the shell for connecting to a personal computer, the networking card being operably connected to the interconnection logic, wherein digital data from the network card and voice data from the telephone can be alternately sent across the telephone wire. The apparatus of claim 1,

wherein the network card is an Ethernet card.

7 – 15. (Canceled)
